## REGISTRAR'S REPORT

---

The College of Physicians and Surgeons of Ontario is the only body enjoying the right to issue licenses to engage in the general practice of medicine in the Province of Ontario. All medical practitioners, before beginning the practice of medicine in Ontario, must obtain the license of the College and have their names entered in the Official Register of the College. Periodically, by order of the Council elected by the Membership of the College, there is printed an alphabetical list of members then named in the Official Register as in good standing in the College, together with the Act under which the College operates, so that members of the medical profession and public officials may have information with relation to the College in convenient form.

An effort has been made in the 1928 Printed Register to give the name of every member in good standing who has been registered since the College records were begun on May 3, 1866.

The Register proper contains all names that appeared in the 1922 printed Register with additions and restorations. The word "deceased" in brackets appears opposite the names of 595 such members, advice of whose death having occurred was duly received in the office of the College, before the publication of this Register. In addition, on pages 252 to 263 appears a list of the names of 2,530 members of the College, known or believed to have been deceased before the publication of the 1922 Register. (It is with the greatest difficulty that facts relating to non-Ontario residents are gathered. Where inaccuracies are noted, corrections sent to the office will be greatly appreciated.) A supplementary list, containing the names of those registered after January 1, 1929, appears on page 251.

From the inception of the College, May 3, 1866, to December 31, 1928, 9,166 names have been entered in the Register. Death or erasure accounts for the disappearance from the same of 2,551 names before 1922, and 623 in the years 1923 to 1928 inclusive, leaving 5,992 names in the Register when this volume went to press.

Of the 5,992 members of the College, living and in good standing, whose names are in this Register, 3,899 are believed to be actively engaged in practice in Ontario, while 191 members of the College are living in the Province, but are not actively engaged in practice therein. The remaining 1,902 members are not at present living in Ontario. Forty-two of these members live close enough to the border to practice in Ontario.

The last official estimate (1928) of the population of Ontario was 3,229,000. There appears to be, therefore, at the present time one medical man to every 819.3 residents of the Province of Ontario.

The following tabulated statement is made up from record appearing in the Official Register:—

At the time of the publication of the last Register (1922) there was a reciprocity agreement between the General Medical Council of the United Kingdom and the College of Physicians and Surgeons of Ontario by virtue of which those holding the certificate of the former could register in Ontario, and those holding the license of the latter could register in the United Kingdom. This arrangement ceased with the last day of December, 1927. There are now, therefore, no members being received through British Registration.

There are still two ways in which licentiate registration can be effected in Ontario, one by passing the examinations of the College, the other by registration through the certificate of the Medical Council of Canada. The manifest advantage of holding the Canada Council certificate consists in the fact that it paves the way for registration, subject to Provincial Council requirements, in any Province in Canada, while the Provincial license obtained through the College examination concerns licensure in Ontario alone. By reason of this fact, students in increasing numbers are taking the examination of the Medical Council of Canada in preference to that of the College. It should not be forgotten that in order to take this examination each Canadian student of medicine must have satisfied all the requirements for examination of his "home" Provincial licensing body.

There is a cardinal distinction between the certificate of the Medical Council of Canada and the license of the College. The former is not a "license" although so named, and does not confer a right to practice in Ontario. The value of the certificate of the Medical Council of Canada consists in the fact, that, subject to satisfaction of local Provincial requirements, registration under it can be effected in any Province of Canada without further examination. Until such registration is effected, no one holding that certificate is free, under the Ontario Medical Act, to engage in practice in any form in the Province of Ontario, nor is any licensed practitioner free to engage or employ the services of any

such unlicensed practitioner. Appropriate penalties are provided for infractions of the Act in these respects. (Every properly registered Member of the College holds a certificate, showing that he is licensed for the calendar year indicated therein.)

Since publication of the last Register (1922), the Ontario Temperance Act has been by legislative enactment consigned to oblivion. "*De mortuis nil nisi bonum.*" By similar legislative enactment a new liquor measure has been brought into force. The former Act enjoined upon the profession the duty of prescribing for the needs of the community, so far as the use of liquor was concerned. The new Act absolves the profession from the obligation of acting as arbiter between the requirements of the Act and the needs of the public. The new Act is known as the Liquor Control Act, and under its "permit" system responsible citizens can obtain their supplies directly from Government stores.

The present narcotic situation in Canada offers a most perplexing problem for solution. The Federal Health Department is employing such measures as it deems appropriate to restrict the use of narcotic drugs to purely legitimate ends. These ends compass its use for the relief of suffering, under prescription of duly qualified medical practitioners. The public is absolutely forbidden to traffic in such drugs, and heavy penalties are provided for infraction of the provisions of the Act relating to them, namely, the Opium and Narcotic Drug Act. Responsibility for proper and legitimate use of these drugs rests entirely with the medical profession.

Not only to the public at large, but to the profession as well, should reminder be made, that offences under this Act are not merely misdemeanors but, under current legislation, constitute criminal offences, which carry with them gaol sentences, and, under proposed legislation, at the option of the Court infliction of lashes in addition. The Federal Health Department (Ottawa) with traditional courtesy welcomes enquiries and imparts information as to privileges enjoyed and responsibilities incurred by the profession, in relation to the carrying out of the provisions of the Act.

It is absolutely imperative that correct addresses for all members of the College be in current use in the College Register as these must be given to the Federal Board of Health for its use in the checking up of signatures on all narcotic orders or prescriptions.

Since publication of the last Register (1922), exercise of the right to use the designation "Doctor" has been, by legislative enactment, confirmed by judicial decisions, confined to those holding the license of the College. Legislation has provided a body known as the Board of Regents for Drugless Practitioners, under which the latter can qualify for enjoyment of certain privileges, in relation to the treatment of human ailments.

This Register is made to be used. It is hoped that it will be kept with books of reference in the office of every medical man in the Province. Unfortunately, the College has very few (or no) copies of the "Ontario Medical Register" published before 1903. If any member of the College has preserved such volumes and feels that they must be removed to make room for more valuable books, the College would be very grateful if, before they are destroyed, advice were sent to it so that, if arrangements could be made, they might be preserved among its permanent valuable records.

H. WILBERFORCE AIKINS,

March 31st, 1929.

Registrar.

REMARKS ON PENAL CLAUSES  
of  
THE ONTARIO MEDICAL ACT

---

The following observations are intended for the guidance of the members of the College of Physicians and Surgeons of Ontario, in carrying into effect the penal clauses of The Ontario Medical Act. All communications with the Registrar of the Council will of course be considered strictly confidential.

It will be convenient to consider separately, those clauses of the Act which provide that the Council may order the erasure from the register, of the name of any Registered Practitioner, and those which impose a penalty of fine or imprisonment in respect of any offence.

**ERASURE FROM REGISTER.**

The following remarks do not apply to erasure by the Registrar for non-payment of fees, (in which case the practitioner will be reinstated on payment of arrears), but only to erasure by direction of the Council, in which case the name erased can only be restored under the provisions of section 32.

The procedure for enforcing this penalty is provided by sections 31, 33, 34, 35.

The Council must before exercising the power of erasing the name of any person from the register, ascertain the facts of the case by a committee, and if the charge is made against any Registered Practitioner, that he has been convicted of any indictable offence, or has been guilty of any infamous or disgraceful conduct in a professional respect, the Council *must* direct such inquiry upon the application of any four Registered Practitioners. The name of any Registered Practitioner may be erased by the Council:—

## THE ONTARIO MEDICAL ACT

### FIRSTLY

If he has been guilty of any indictable offence. (Sec. 31.)

In this case the Registrar should be furnished with the christian name and surname of the party, the offence for which he was convicted, the place and assize at which he was tried, together with his last known address.

### SECONDLY

If he has been guilty of any infamous or disgraceful conduct in a professional respect. (Sec. 31.)

In this case full particulars of the matters complained of together with a full statement of the evidence by which the charge is to be established, should be communicated to the Registrar.

In case any member becomes aware that any person who has been convicted of an indictable offence, or has been guilty of any infamous or disgraceful conduct in a professional respect, intends to apply for registration, he should communicate to the Registrar the facts above mentioned in order that they may be kept on record in case of any such application.

### THIRDLY

If he has procured or caused to be procured his registration under the Act, by any false or fraudulent representations. (Sec. 46.)

In order that any person may be entitled to be registered under the Act, he must be qualified within the provisions of sections 21, 22 and 23, and Schedule B therein referred to, and the Rules, Orders and Regulations of the Council passed under the authority of the Act.

In laying a charge under Section 46 of procuring registration by false or fraudulent representations or declarations the facts upon which such charge is based, and the evidence by which it is to be established should be fully communicated to the Registrar.

## THE ONTARIO MEDICAL ACT

The false or fraudulent representation must be such, that unless the same were true, the person applying would not be entitled to be registered under the sections and regulations above referred to.

Proof of the alteration, falsification, or forgery of a certificate or other document entitling the person to registration would be sufficient proof of a charge made under this section.

Any material alteration of a certificate amounts to forgery thereof.

“A Material Alteration” is of the date, name of the person or other fact which would involve the validity of the instrument for the purposes for which it is produced.

### FINE OR IMPRISONMENT

In order to enforce the clauses of the Act which impose a penalty of fine or imprisonment it is necessary to lay an information before some Magistrate.

Every Justice of the Peace has jurisdiction to dispose of every offence under the Act.

Every Justice of the Peace will furnish the necessary form of information with blank spaces for the names, places and dates and description of the offence charged, which should be set forth in the very words of the section under which the charge is laid.

The information having been sworn by the party laying the charge, the Magistrate will issue his summons, and if the party does not appear, or in the first instance if he thinks fit, he may issue a warrant for the arrest of the party and upon the return of the summons or upon the arrest, the case will be proceeded with in the ordinary way.

It must be remembered that by section 56, every prosecution must be commenced within one year from the date of the alleged offence.

When the conviction is obtained it is important to see that the formal conviction is in the very words of the section in question, and that the penalty imposed is strictly within the

## THE ONTARIO MEDICAL ACT

prescribed limits. It is most important that no penalty should be imposed except what is strictly within the terms of the Act, as any variance in this respect would only result in the complete failure of the prosecution, as *e.g.*, the Justice may award payment of costs in addition to the penalty, and in default of payment may commit the offender to jail for any term not exceeding one month, yet he must not include in the costs, the costs of commitment and conveying to jail, and if he does so the conviction is void and may be quashed on appeal.

### SECTION 46, SUBSECTION 3.

We have already seen that the name of any person may be erased from the register who has procured or caused to be procured his registration by any false or fraudulent representations, and by this subsection a penalty is provided not only for the wilful commission of this offence, but also for the wilful attempt to commit it, and a further penalty of from \$20 to \$50 is imposed upon every person aiding and assisting him therein.

The sworn statement required in order to obtain a conviction does not differ from that required to procure the erasure of the name of the offender from the register, and in case the charge is for an attempt to commit an offence, all that would be necessary would be to prove an application to the Registrar for registration, and the making to him of such false statements, either verbally or by the production of documents containing them.

### SECTION 47.

In order to prove an offence under this section it is not necessary to produce any proof that the person charged was not registered at the time that the alleged offence was committed, for by section 54 the burden of proof as to registration is upon the person so charged.

The offence under this section consists in practicing, professing to practice, or advertising to give advice in, Medicine, Surgery or Midwifery, provided always that any such act is done for "hire, gain, or hope of reward."

## THE ONTARIO MEDICAL ACT

The person laying the charge must be prepared with evidence to prove against the person charged—

1. That he has attended persons and has treated them or prescribed for illness or has done some act which amounts to the practice of Medicine, Surgery or Midwifery, or—

2. That he has professed to practice or has advertised to give advice in Medicine, Surgery or Midwifery by holding himself out to the public or to individuals as a Physician or Surgeon. This may be proved by persons aware of the fact to whom he has stated his willingness to act in such capacity or who have seen any advertisement, sign or notice either in a newspaper or publicly exposed about his premises, and in case an advertisement in a newspaper or by the distribution of cards is relied upon such advertisement should always be produced and identified.

The offence may sometimes be proved by a druggist who has prepared prescriptions, but in all cases the best evidence is that of the patient, where the charge is the actual practice of Medicine.

If sufficient evidence is given to cover one or both of the points above referred to, the proof of the charge will be completed by proving that what was done was for "hire, gain or hope of reward". Upon this point proof should be offered that he has taken fees or has been paid for medicine, services rendered, or that he has stipulated for payment or made some bargain for remuneration either in cash or otherwise.

### SECTIONS 48 AND 49.

Section 48 deals with the offence of falsely pretending to be a Physician and the assumption of any title, addition or description to which the person charged is not legally entitled. Section 49 imposes a heavier penalty for the use of a title implying, or calculated to lead people to infer, that he is registered or that he is a Physician and Surgeon recognized by law. Proof should be given of the use of any such title in the same way as above mentioned for professing or advertising to give advice.
